Sharique Akhtar

AI Engineer Python–Go– Distributed Systems – FastAPI–PostgreSQL– GCP

Noida,UP akhtersharique75@gmail.com +91 7520371336 LinkedIn GitHub Leetcode

Built and shipped **CareerGraph** –Built an AI-powered platform that turns your resume and LinkedIn connections into a smart network map — it finds hidden paths to referrals and matches you to jobs based on who you actually know, not just keyword search. Used graph databases and AI agents to make the matching fast and genuinely useful.

Experience and Projects

VAIA – *Full Stack AI Intern*

- Built and maintained **backend APIs and database logic** (FastAPI, PostgreSQL) for production, client-facing ESG and investment-advisory tools used by real investment and sustainability teams.
- Integrated an **LLM API** into an existing backend workflow to add AI-assisted functionality to a live product surface; fixed bugs and improved reliability of existing backend endpoints.

CareerGraph.AI – Agentic GraphRAG Networking Platform GitHub

FastAPI, Next.js, Neo4j, LangGraph, Sigma.js (WebGL), Celery, Redis, Playwright

- Engineered an **asynchronous ingestion pipeline** (**Celery**, **Redis**) to parse LinkedIn archives and resumes entirely in-memory into a unified **Vector-Graph database**
- Built a **multi-agent orchestration layer** (**LangGraph**) paired with a stealth **Playwright** scraper, running hybrid **Cypher queries** (vector similarity + graph traversal) to surface hidden 2nd/3rd-degree referral paths — turning a static resume into a live map of who can actually get you hired.

- Fit Week – AI-Powered Fitness Automation System GitHub Live Demo

Java (Spring Boot), Python, React, TypeScript, LangGraph, AWS (EC2/S3/CloudFront/RDS), Docker, PostgreSQL

- Identified and resolved a **production unauthorized access risk**: traced to exposed S3 bucket endpoints bypassing CDN security; implemented strict Origin Access Control (OAC) and CORS security policies – eliminated 100% of direct bucket data exposure.
- Engineered a **distributed full-stack application** serving 50+ concurrent users and 10+ active beta users – robust Java Spring Boot REST API backend containerized using Docker for Amazon EC2 deployment.
- Built **autonomous AI coaching agents** using Python and LangGraph – employed multi-step reasoning to process complex user telemetry and output personalized, 90-minute daily training recommendations; entirely automated the coaching workflow.
- Traced **global frontend latency** to inefficient asset delivery; deploying it globally via AWS CloudFront CDN, reducing average load times from 3+ seconds to under 300ms globally.

LoomAI – Multimodal Agentic RAG Architecture GitHub Live Demo

FastAPI, React, LLaMA 3.3 (Groq), FAISS, OpenAI Whisper, LangChain, AWS EC2/S3, Vercel

- Engineered a **multimodal ingestion pipeline** handling PDFs and media; optimized processing for a **2GB RAM AWS EC2 (t3.small)** environment by deploying **Whisper-Tiny**, enabling **timestamp-linked transcription** extraction.
- Designed a high-performance **Agentic RAG** engine using **LangChain** and **Groq**-hosted **LLaMA 3.3**, achieving **sub-second inference latency (~300ms)** by querying an in-memory **FAISS** index via **L2 distance similarity search** to return the top-3 most relevant chunks.

Technical Skills

Languages: Python, C++, TypeScript, JavaScript, SQL

Backend and APIs: Java 17 (Spring Boot), FastAPI, Flask,REST API Design, Microservices, asyncio, WebSockets, OAuth2, JWT, Rate Limiting

Databases and Storage: PostgreSQL, NeonDB, AWS RDS, Drizzle ORM, pgvector, Vector DB, Redis, FAISS, Supabase, AWS S3

Cloud and DevOps: AWS (EC2, S3, CloudFront, RDS), Docker, Nginx, Certbot (SSL/TLS), CI/CD, GitHub Actions

System Design: Multi-tenant Architecture, Concurrency and Session Isolation, Distributed Caching, Async Task Queues, API Design

AI/ML (Applied): PyTorch, TensorFlow, Keras, Hugging Face Transformers, Sentence Transformers, LangChain, LangGraph, LLM Inference (Groq API, Llama 3.2), Vector Embeddings, RAG

Frontend and Tools: React, Next.js, Tailwind CSS, Clerk, Playwright, Git, Postman, Jupyter, Matplotlib, Seaborn

Education

Dr. B. R. Ambedkar National Institute of Technology (NIT) Jalandhar *July 2022 – June 2026*

Bachelor of Technology (B.Tech) in Information Technology(IT)

Achievements

- Solved **1000+ Data Structures and Algorithms problems** on LeetCode, **100+ on Codeforces**.
- Achieved an **All India Rank of 16,000** in JEE Mains Engineering Exam.
